CLASSIFICATION SECRE

SECRET, 25X1 8. Prior to about 5 September, about 200 men from Fuenfeichen worked as harvesters. All soldiers on leave were scheduled to return to their unit by 12 September. An inspection team from Pasewalk was expected to arrive on 18 September. 9. Officers identified in Fuenfeichen included Senior Lieutenant Petzold (fnu), Senior Lieutenant Mieder (fnu), and Lieutenant Jahnke (fnu). 25X1 From 6 to 26 August, the unit from Fuenfeichen commanded by Captain Fritzlar was in the Frankfurt/Oder area where it held practices. On 4 September, only limited activity was observed in the Fuenfeichen installation. 11. A KVP soldier from Rostock said that the 2d Infantry Regiment Rostock was rotated to Ruegen Island for training in August. 3 12. At about 1900 on 5 September, a KVP rail shipment departed from Stralsund toward Rostock. The train included 1 coach, 4 boxcars which were occupied by enlisted men, 12 cars with trucks, 3 cars with 8 canvas-covered guns, 1 command car, and 1 radio truck. The soldiers escorting the shipment wore black collar patches. 25X1 13. At about 2200 on 6 August, a train which carried AA guns from the Kavallerie Kaserne in Pasewalk left the Pasewalk railroad station toward Neubrandenburg. The train consisted of 11 boxcars and 29 flatcars and carried approximately 40 trucks, one jeep, one ambulance and at least 16 AA guns. On 2 September, a unit from the Kavallerie Kaserne, which had returned from Zingst, was unloaded at the Pasewalk railroad station. 14. At about 1900 on 8 August, a unit from the Kavallerie Kaserne in Pasewalk was entrained at the Pasewalk railroad station and left toward Neubrandenburg. Soldiers observed wore yellow-bordered black epaulets. The unit consisted of 84 men, 17 trucks and 2 field kitchens. 25X1 Comment. It is possible that exercises larger than regimental level will be held after the return of personnel employed in the harvesting of crops. On orders by the MdI/KVP, fall inspections of all units were to take place in September. Comment. It is believed that the engineer training site in the 25X1 Oderberg area is located near Hohensaaten. Comment. A temporary transfer to Ruegen Island of the 2d Inf Regt 25X1 Rostock is reported for the first time. 25X1 4. Comment. Motor vehicle 25X1 which has been continuously been observed in 25X1 Altwarp. Composition of train and service color observed support the assumption that the train carried an AAA unit, possibly elements of the AAA Regt Altwarp of the Mechanized Division Eggesin, toward Barth (Zingst ). 25X1 Comment. Other information also indicated that elements of the AAA regiment from Pasewalk transferred to the Zingst area for firing practices in August. NODEX
